

MARCO® 2.0 CU. FT. L-SERIES BLAST POT

Marco 2.0 Cu. Ft. L-Series Blast Pot is the right piece of equipment for small industrial air-blasting projects and areas that are difficult to access with larger equipment. Marco blast pots are proudly engineered and manufactured in the USA and built in accordance with ASME guidelines. L-Series Air-Blast Pots are commonly used with mineral abrasives, slags, crushed glass, and glass bead abrasives. Typical applications for the 2.0 Cubic Foot L-Series Air-Blast Pot include: auto restoration, concrete restoration, lawn furniture, construction equipment, and hand tools.

SIMPLE CONTROLS

The Marco 2.0 Cu. Ft. L-Series Blast Pot eliminates the need for inlet valve, outlet valve, and twinline hoses, greatly simplifying operation and maintenance.

REDUCED COST

The Macro Bantam Abrasive Metering Valve precisely meters most abrasives, reducing the amount of the abrasive consumed, increasing production rates at the nozzle.

PORTABILITY

The lightweight design makes the Marco 2.0 L-Series Blast Pot ideal for mobile work, where the operator may be in an area difficult to access with large equipment.

The cast iron Marco 153 Remote Control Valve offers activation and deactivation control of the abrasive flow at the nozzle.

The Marco Bantam Abrasive Metering Valve precisely meters most abrasives, reducing the amount of abrasive consumed, increasing production rates at the nozzle.

The Marco 2.0 Cu. Ft. L-Series Blast Pot has a heavy-duty handle. and solid rubber tires for maneuverability quickly and easily around the work site.
