ALLREDI® WATER RING

The Allredi Water Ring is used as part of an abrasive blasting system to reduce dust up to 80%. The tool is designed with no moving parts and works by propelling water at the air and abrasive mixture after it exits the blast nozzle to create a water mist that captures dust. The Allredi Water Ring easily attaches to a blast nozzle by tightening three thumbscrews and attaching your water supply hose. Typical applications include blast booths, blast yards, offshore platforms, oil refineries, pipelines, storage tanks, and water towers.

IMPROVED SAFETY

Regulate the volume of water coming to the Allredi Water Ring with an in-line ball valve located at the end of the device. The water from the Allredi Water Ring creates lower dust levels to increase visibility and reduce the time required to clean the work area.

EASE OF USE

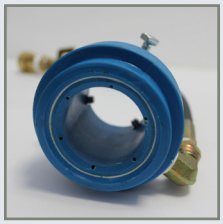

The Allredi Water Ring easily attaches to most blast nozzles and can be setup in seconds to your water supply hose to limit your downtime.

COMMITMENT TO QUALITY

Our commitment to producing the highest quality products in the industry demands strict control over our raw materials and manufacturing processes. All components used in the manufacturing of Allredi products adhere to strict process controls as specified by Allredi's Quality and Engineering team.

Reduce dust in your work area and improve visibility and overall cleanliness on your work site.

Water is propelled from six holes and impacts the air and abrasive stream, creating a mist that traps the dust.

An in-line ball valve is used to regulate the volume of water supplied to the spray head from a standard garden hose.

The Allredi Water Ring attaches to blast nozzles with a 1-1/2" outer diameter.

ALLREDI® WATER RING

KEY FEATURES

- Reduces dust by up to 80%
- Corrosion-resistant urethane spray head
- Connects to a water supply of 30-60 psi water pressure
- Fits blast nozzles with a 1-1/2” outer diameter
- Water volume regulator

OPTIONAL ACCESSORIES

Blast Nozzles

A wide variety of blast nozzles are available to meet even the most challenging work site requirements.

Abrasives

Choose from an extensive range of abrasives for any blasting surface or job.

Blast Hose

Allredi Blast Hose is available in standard lengths of 50, 100 and 400 feet, and custom lengths up to 200 feet.

Protective Clothing

Allredi offers a variety of light weight coverall options, including DuPont® Tyvek®, to protect workers from water and overspray.
