# History of Innovation in Head Protection

For more than 100 years, Bullard has focused its efforts on saving lives with quality safety products. Bullard is committed to providing products that are widely known to customers as “best in class.”

## We Invented the Hard Hat

Founded in San Francisco in 1898 by Edward Dickinson Bullard, the Company originally supplied carbide lamps and other mining equipment to gold and copper miners. Bullard’s introduction of the first hard hat in 1919 represented the first of many innovative designs that have led the Company to its prominent position in head protection for industrial and emergency response applications.

During the 1930s, while the Golden Gate Bridge was being constructed in San Francisco, Bridge engineer Joseph B. Strauss contacted Bullard to request that the Company adapt its hats to protect bridge workers. Bullard not only supplied hard hats for this famous project, but its engineers also designed an original supplied air respirator for workers responsible for blasting the steelwork prior to the application of the Bridge’s International Orange paint.

## Continuing the Legacy

From our Classic Series to the advanced protection offered by our Advent® rescue helmet, all Bullard hard hats and helmets have been carefully engineered to deliver superior performance, comfort, quality, and durability. Bullard is fifth-generation family owned and manufactures all products in the U.S.A.

# AboveView™

Featuring a see-through visor that allows workers to see hazards overhead, the patented AboveView Full-Brim Hard Hat is designed with a wide brim for increased protection from the elements and comes equipped with accessory slots for a variety of attachments. ANSI/ISEA Classification: Z89.1, Type I, Class E and G.

AboveView comes with all the standard Bullard hard hat comfort features including, 3/4" suspension, large absorbent cotton or easy-to-clean vinyl brow pad, and Flex-Gear® ratchet suspension. Like all Bullard hard hats, the AboveView is designed for users to experience the ultimate comfort while on-the-job. AboveView sits below the "nape" portion of the user's head ensuring a secure fit and lessening the possibility of the hat falling off while working.

AboveView is the only hard hat with a replaceable clear brim visor. Replacement visors are available in clear, grey and yellow tints. The AboveView is available in all Bullard standard colors and can be customized with striping and logos.

**Model AVRY**  
(yellow tint visor)

# Classic Series

The foundation of the Bullard head protection product line is a selection of classically styled models. Designed with a wide profile and brim, Classic hats and caps enhance ventilation, provide increased protection from the sun and rain, and offer greater comfort for outdoor workers.

All Classic hard hats and caps are made from high-density polyethylene and come equipped with Bullard 6-point self-sizing pinlock or Flex-Gear® ratchet suspension system. Both suspension systems allow for a truly customized and comfortable fit with 1" wide seamless nylon straps, vertical adjustment keys, and an absorbent cotton brow pad. All Classic hats and caps meet or exceed ANSI/ISEA Z89.1, Type I, Class E & G requirements. Models C30 and C33 also meet or exceed CSA Z94.1, Type 1, Class E & G requirements. The extra-large C34 accommodates larger heads and provides 12.5 percent more interior space and increased air flow. The C35 offers full brim protection with accessory slots for face and hearing protection options.

**Model C30**  
(cap style)

**Model C34**  
(extra-large full-brim)

**Model C35**  
(extra-large full-brim with accessory slots)

# Standard Series

Lightweight and trim, the Standard from Bullard features a low center of gravity for exceptional balance. The Standard Series offers a wide variety of hat styles: flat-front, cap style, vented, and full-brim.

Available with either a 4-point self-sizing pinlock or Flex-Gear® ratchet suspension system, Standard Series hard hats offer comfort with a snug fit. Made from high-density polyethylene, Models S51, S61, and S71 meet or exceed ANSI/ISEA Z89.1, Type I, Class E & G requirements. Vented model S62 meets or exceeds ANSI/ISEA Z89.1, Type I, Class C requirements. Model S51 also meets or exceeds CSA Z94.1, Type 1, Class E & G and EN397 requirements.

**Model S51 with hearing protection**

**Model S61 (cap style)**

**Model S62 (vented cap style)**

# High Heat Series

To meet the demands of high heat environments, Bullard offers hats and caps in technologically advanced thermoplastic. Constructed from the same materials as our rugged firefighter helmets, Models 911C and 911H are ideal for utilities, welding, foundries, and steel mills.

Available with either a 6-point self-sizing pinlock or Sure-Lock® ratchet suspension system. Both suspension systems allow for a truly customized and comfortable fit with 1" wide nylon straps, vertical adjustment keys, and an absorbent cotton brow pad.

The 911C and 911H helmets meet or exceed ANSI/ISEA Z89.1, Type I, Class E & G requirements.

**Model 911C**  
(cap style)

**Model 911H**  
(full-brim)

# Bump Cap

Designed for industries such as meat and food processing, utility meter reading, pest control, fruit harvesting, auto repair and laboratories, Bullard Bump Cap and First Base® offer a variety of user options.

## The Bullard Bump Cap

Bullard set the standard for head protection in 1919 and continues that tradition with its new Bump Cap designed with style and comfort for today's workers.

## First Base

The First Base bump cap combines the style appeal of a baseball cap with the safety of a low-density polyethylene (LDPE) inner liner. Embroidering available for a fully customized look.

**! NOTE:** Bump caps provide limited protection against minor bumps and abrasions, but are not designed for applications requiring ANSI/ISEA approved head protection.

HEAD PROTECTION  
MUST BE WORN

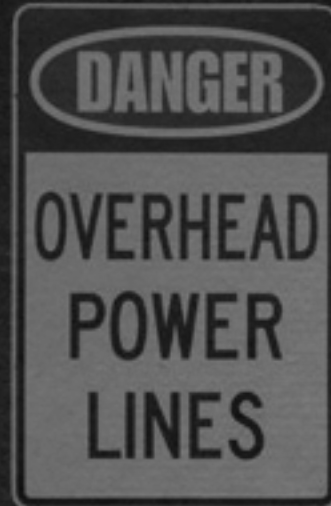

# Advanced Series

## Vector

The Vector offers advanced head protection at an affordable price. Designed to be lightweight and comfortable, it is ideal for construction, utilities, and everyday work environments. Available with self-sizing pinlock or Flex-Gear® ratchet suspension.

Offering lateral and top impact protection, Vector is nearly as lightweight as conventional hard hats. Vector helmets meet or exceed ANSI/ISEA Z89.1, Type II, Class E & G, as well as CSA Z94.1, Type 2, Class E & G, providing impact protection for the top, front, back, and side of the head.

**VTR**  
(with ratchet suspension)

**VTP**  
(with pinlock suspension)

**A1 Advent  
Helmet**  
(with 2-point chinstrap)

**A2 Advent  
Helmet**  
(with 3-point chinstrap)

## Advent®

The Advent helmet is designed for workers who need head protection where there is high risk of lateral and overhead impacts, including those resulting from falls. At just over 25 ounces, the Advent helmet is half the weight of conventional firefighter helmets and ideal for specialized rescue operations.

Advent is available with a 2-point or 3-point chinstrap and can be equipped with a variety of accessories, including faceshields, ear/neck protectors, and hearing protectors. It can be customized with decals and reflective stripes. Advent is only available with a Flex-Gear® ratchet suspension.

Offering lateral and top impact protection, Advent helmets meet or exceed ANSI/ISEA Z89.1, Type II, Class E & G, providing impact protection for the top, front, back, and side of the head.

# The Best Hard Hat Decoration Program

## Quality Printing

Pad printed logos are permanent and will not peel crack or fade like a decal or sticker.

## Order Size

Twenty-piece minimum order required for custom logo work.

## Pricing

No hidden charges. No set-up charges. No artwork charges.

## Delivery

Bullard Logo Shop offers the fastest delivery in the industry.

## Follow these simple steps to configure **YOUR** Bullard Hard Hat or Bump Cap...

- 1 Go to [www.BuildYourBullard.com](http://www.BuildYourBullard.com)
- 2 Select Head and Face Protection and your desired model.
- 3 Register and Sign In to request a proof!
- 4 Build your custom hat with your logo!

## Camera Ready vs. Non-Camera Ready

### Camera Ready Means...

- Faster proof turn around time in just three (3) business days
- Precise logo reproduction

Typical Camera Ready art file extensions include:

- .eps (Vector EPS)
- .pdf (Vector PDF)
- .ai (Illustrator)

### Non-Camera Ready Means...

- Longer proof turn around time (5-7 business days)
- Must supply Pantone® colors

Typical Non-Camera Ready art file extensions include:

- .tiff (Tag Image File Format)
- .jpg, .jpeg (Joint Photographic Experts Group)
- .pdf (Raster PDF)
- .png (Portable Network Graphics)

## Striping

Bullard offers a variety of Scotchlite® striping options in various colors and reflectivity. Stripes can be applied around the brim or between the ribs of the hat.

Decorative stripe colors are available to accent your custom logo, or use fluorescent and highly reflective stripes to improve worker visibility.

# Body Temperature Management

## Isotherm® Cool Vest

Revolutionary Isotherm technology from Bullard offers unparalleled cooling power. Unlike ice or gel packs that steadily lose their effectiveness, the Bullard Isotherm Cool Vest will remain at a constant 55°F for hours of cooling. Isotherm can help reduce the chance of heat-related illnesses that sometimes occur in today's difficult work environments. Isotherm uses a simple, interchangeable, front/back cool pack system that provides continuous cooling to the worker's upper body.

## Hot Weather Accessories

Hot weather accessories help keep workers cool and enhance productivity. Evaporative cooling products include vest, crown and neck shade, and beanie, and provide immediate relief from sweltering temperatures. Our 360-degree extended sunshields and cotton neck protectors offer added protection from ultra-violet rays and sunburn. For added comfort, try the high performance Polartec RBPCOOL brow pad or underbrim green decal for glare reduction.

## Other Hard Hat Accessories Include:

- Replacement brow pads (available in cotton, vinyl, and cooling materials)
- Miners lamp bracket and cord holder kit
- Chinstraps
- Goggle clips
- Ratchet cover
- Accessory slot plugs
