SCANMASKIN 28 WORLD SERIES GRINDER - REMOTE CONTROL

Part # 10SC572855

The machine features cast alloy components along with a floating shroud, designed for years of durability and dust free operation. Scanmaskin 28 RC is equipped with a new tool head for better balance and tool support. The machine also has a new electrical cabinet with an improved cooling system. The cooling system is sealed and protects the electrical components against heat and dust. The wheels of Scanmaskin 28 RC are 370 mm and can be quickly released, which makes it easy for the operator to operate the machine manually.
