MARCO® 0.20 CU. FT. SUCTION BLASTER

The 0.20 Cubic Foot Suction Blaster is the right piece of equipment for small touch-up projects and maintenance. The unique design of the Suction Blaster allows the operator to make adjustments to the blend of abrasive and air mixture until the optimal flow of abrasive is reached. The “fail-to-safe” design of the Suction Gun allows the operator to start and stop the flow of abrasive at the nozzle. Suction Blasters are commonly used with slags, glass beads, and mined mineral abrasives. Typical applications for the 0.20 Cu. Ft. Suction Blaster includes: auto restoration, lawn furniture, farm implements, and hand tools.

ENHANCED SAFETY

OSHA requires a blast pot to be equipped with a remote control system, which only operates with continuous hand pressure and closes immediately upon release of the control switch by the operator (29 CFR 1910.244(b)). This remote control system meets the OSHA requirement by providing a “Fail-to-Safe” configuration, which will deactivate the remote control system in the event the operator drops or loses control of the remote control switch.

An tip-resistant ring base reduces tipping during the blasting process. The durable steel construction prevents the tank from easily tipping over during the blasting process.

PORTABILITY

A heavy-duty handle and lightweight design allow for the suction blaster to be maneuvered quickly and easily around the work site.

COMMITMENT TO QUALITY

Our commitment to producing the highest quality products in the industry demands strict control over our raw materials and manufacturing processes. All components used in the manufacturing of Marco brand products adhere to strict process controls as specified by Allredi’s Quality and Engineering team.

The versitile suction hose can be attached to the abrasive hopper, or the suction tube can be inserted directly into a bag of blasting abrasive.

The steel construction of the abrasive hopper with a tip-resistant base provides superior stability over plastic models with a three point base.

A petcock is incorporated into the abrasive mixing chamber to improve the flow of abrasive into the suction hose, providing superior control over the abrasive flow.

MARCO® 0.20 CU. FT. SUCTION BLASTER

Marco
Powered by ALLREDI

KEY FEATURES:

Tip-Resistant Base for Improved Stability

Heavy-Duty, 1/8” Steel Construction

10 Feet of 3/8” I.D. Suction Hose with Fittings

Suction Gun with a Ceramic Nozzle, two Inlet Air Jets

6” Diameter Opening for Easy Filling

Empty Weight: 23 lbs.
Fill Height: 18-1/2”
Base Width: 14”
Vessel Width: 6”

OPTIONAL ACCESSORIES

Abrasive Screen & Funnel

The Abrasive Screen keeps damaging debris out of the hopper. The Funnel helps prevent abrasive loss while filling the hopper.

Air Hose

3/8” I.D. Air Hose is the ideal hose to use for transferring abrasives to the Suction Gun.

Blasting Respirator

A light-duty abrasive blasting respirator protects the operator from dust and abrasive rebound.

Blasting Abrasives

Extra fine blasting abrasives are ideal for optimal performance of the 0.20 Cu. Ft. Suction Blaster.
